Answers and marking guidance

Award one mark per correct, developed point unless stated. Other valid answers should be credited.

2 Describe why a pilot hole is drilled before inserting a screw.

- It guides the screw and stops the wood splitting

3 Quick check

- a) Can be taken apart and moved
- b) Countersunk
- c) To stop the wood splitting
- d) Exterior (waterproof) glue

4 Key terms

- 1 – D
- 2 – B
- 3 – E
- 4 – C
- 5 – A
- 6 – F

5 State a suitable adhesive and give a reason.

- Exterior / waterproof PVA, or polyurethane / resin glue
- It is waterproof, so the joints won't fail in the rain

6 Name two mechanical fixings that could reinforce a butt joint.

- Screws
- Nails / panel pins
- Angle bracket
- Corner block
- Dowels
