By the end of this worksheet I can…

- ☐ choose and justify bar charts, line graphs and pie charts
- ☐ explain the benefits of icons and symbols
- ☐ describe effective promotional graphics

I DO — Worked example

Read how a full-mark answer is built

A report shows (i) the share of sales by colour, (ii) sales month by month for a year, and (iii) sales in five shops.

1 State the most suitable chart for each and explain why. (3 marks)

Full-mark answer each ✓ is one mark

(i) A pie chart, because it shows each colour's share as a part of the whole ✓. (ii) A line graph, because it shows the trend in sales over the year and can help predict future sales ✓. (iii) A bar chart, because it makes it easy to compare sales between the five shops ✓.

Why marks are not awarded

"Pie chart, line graph and bar chart, because they are easy to read."

0 marks if "easy to read" is the only reason given.
