D&M WITH MR KELLY

Name _____ Class _____ Date _____

By the end of this worksheet I can…

- ☐ identify flashing, ejector marks, draft angles and injection points
- ☐ explain how ribs and webs strengthen a moulded part

I DO — Worked example

Read how a full-mark answer is built

A TV remote control casing is injection moulded in two parts.

1 State two features that show the casing was injection moulded. (2 marks)

Points that earn marks from the marking instructions: one ✓ per point

- ✓ Ejector pin marks (small circles)
- ✓ Injection point mark

Why marks are not awarded

- ✗ "Smooth" or "shiny" on their own

YOU DO — On your own

No notes. Check your answers afterwards.

3 Quick check: tick one box for each.

a) Why are ribs added to the inside of a plastic casing?

☐ To make the casing heavier so it feels solid and expensive ☐ To give a better grip on the outside of the casing ☐ Add rigidity without thick walls and hold internal parts ☐ To use up any extra plastic left in the mould

b) Thin excess plastic along the edge of a moulded part is called…

☐ Draft ☐ Rib ☐ Ejector pin mark ☐ Flashing

Check and reflect

Mark your answers with the answer sheet. Go back to the checklist on the site and re-rate each “I can” statement above. Which one still needs work?
