Briefs, research & evaluation

National 5 · Design · Worksheet

D&M WITH MR KELLY

Name _____ Class _____ Date _____

By the end of this worksheet I can…

- ☐ explain why research is carried out during the design process
- ☐ describe the key stages of a questionnaire
- ☐ describe the key stages of a user trip
- ☐ give reasons for choosing a research technique
- ☐ name the methods used to evaluate products: comparisons, user trials, comparison against the specification, questionnaires

I DO — Worked example

Read how a full-mark answer is built

A designer is researching garden furniture.

1 Describe three key stages of carrying out a questionnaire. (3 marks)

Full-mark answer each ✓ is one mark

Decide what information is needed and write a short set of clear questions ✓. Choose the target audience, for example 20 gardeners aged 30–60, and how many to ask ✓. Give it out, collect the answers and analyse them, presenting the results as graphs ✓.

Why marks are not awarded

"Write it, hand it out, get it back."

1 mark: single words or very short stages barely describe anything.

WE DO — Guided practice

Use the starters and word bank to help you

The designer also wants to research existing products.

2 Name an alternative research technique to a questionnaire. (1 mark)

Sentence starters

1. …

Word bank

reviews · research · comparison · User trip · user trial

Tip: 1 marks = 1 separate, developed points.

YOU DO **On your own** No notes. Check your answers afterwards.

3 Quick check: tick one box for each.

a) What is the first key stage of a questionnaire?
☐ Identify what information is required ☐ Trial the questionnaire with a small group ☐ Choose whether to use open or closed questions ☐ Decide how the results will be displayed

b) Which of these is secondary research?
☐ A user trip ☐ Measuring critical sizes ☐ A questionnaire you wrote ☐ A product review in a magazine

c) Why is a questionnaire trialled before it is distributed?
☐ To make sure enough people in the target market will complete it ☐ So that it counts as both primary and secondary research ☐ To find confusing or unhelpful questions before wasting responses ☐ To decide which target market the questionnaire should go to

d) Who normally carries out a user trip?
☐ A member of the target market ☐ A member of the design team ☐ A retailer ☐ A manufacturer

4 Key terms: write the letter of the matching description next to each term.

1. **Primary research**	____	**A** Information you gather yourself, e.g. questionnaires, user trips, user trials, product comparisons.
2. **Secondary research**	____	**B** Information gathered by someone else, e.g. books, journals, product reviews, websites.
3. **Key stages of a questionnaire**	____	**C** Identify info needed → decide who/how many → choose question types → trial it → distribute, collect, analyse.
4. **Evaluation methods (N5)**	____	**D** Comparison to other products, user trials, comparison against specification, questionnaires.

5 Describe how a specification is used by a designer during the design process. (2 marks)

A designer carried out a user trip on a camping tent.

6 Outline three areas of the tent the designer would evaluate during the user trip. (3 marks)

Check and reflect

Mark your answers with the answer sheet. Go back to the checklist on the site and re-rate each “I can” statement above. Which one still needs work?
