# Cramping & gluing up

National 5 · Bench work & joints · Worksheet

WOODWORK WITH MR KELLY

Name _____ Class _____ Date _____

**By the end of this worksheet I can…**
- ☐ choose sash, G, mitre and band cramps
- ☐ explain the purpose of dry cramping
- ☐ glue up and check a frame for square

## I DO — Worked example

Read how a full-mark answer is built

*A pupil is gluing up a coffee table frame.*

**1 Describe two safety or quality checks to make after the frame is cramped.** (2 marks)

**Points that earn marks** from the marking instructions: one ✓ per point
- ✓ Measure the diagonals to check the frame is square
- ✓ Check the frame isn't twisted (winding) by sighting across it

## WE DO — Guided practice

Use the starters and word bank to help you

*A G-cramp is used to hold a small part while the glue sets.*

**2 Describe how to stop the cramp marking the wood.** (1 mark)

**Sentence starters**
First, …
Next, … using a …

**Word bank**
between · blocks

Tip: 1 marks = 1 separate, developed points.

## YOU DO — On your own

No notes. Check your answers afterwards.

**3 Quick check: tick one box for each.**

**a)** How do you check a frame is square after cramping?
☐ Look at it ☐ Use a marking gauge ☐ Measure both diagonals ☐ Measure the width only

**b)** Which cramp would you use to glue a picture frame's mitres?
☐ A pair of long sash cramps ☐ The bench vice and a softwood block ☐ Two G-cramps, one at each corner ☐ Mitre or band cramp

**c)** What is the purpose of dry cramping?
☐ To help the glue set and dry faster ☐ To check the fit and squareness before gluing ☐ To stain the wood evenly before assembly ☐ To clean dust out of the joints before gluing

**d)** How do you stop a G-cramp marking the wood?
☐ Use scrap blocks under the jaws ☐ Tighten the cramp as much as possible ☐ Use more glue so the cramp slides ☐ Wet the wood so it doesn't dent

**4 Key terms: write the letter of the matching description next to each term.**

| | | |
|---|---|---|
| 1. **Sash cramp** | ____ | **A** A trial assembly without glue to check fit and squareness |
| 2. **G-cramp** | ____ | **B** Holds mitre joints at 90° |
| 3. **Mitre cramp** | ____ | **C** Small cramp for holding work to the bench or small parts together |
| 4. **Band cramp** | ____ | **D** A strap for irregular or many-sided shapes |
| 5. **Dry cramping** | ____ | **E** Measure both diagonals: they should be equal |
| 6. **Checking a frame is square** | ____ | **F** Long bar cramp for frames and carcases |

*Before gluing the frame, the pupil dry cramps it.*

**5 Explain the purpose of dry cramping.** (2 marks)

**6 Explain what is meant by ‘Stopping cramps denting the wood’.** (2 marks)

**7 Explain what is meant by ‘Why wipe off excess glue’.** (2 marks)

**Check and reflect**

Mark your answers with the answer sheet. Go back to the checklist on the site and re-rate each “I can” statement above. Which one still needs work?
