Answers and marking guidance

Award one mark per correct, developed point unless stated. Other valid answers should be credited.

2 Describe one way of marking out to reduce waste.

- Lay parts close together / nest them so there's little space between
- Start at one end of the board and cut from the edge so offcuts are as large as possible
- Avoid defects such as knots and splits when planning so parts aren't rejected

3 Quick check

- a) Length
- b) Diameter 25 mm
- c) Lengths and breadths
- d) Thin dashed

4 Key terms

- 1 – E
- 2 – D
- 3 – F
- 4 – C
- 5 – A
- 6 – B

5 State the type of line used to show the shelf.

- Thin dashed line (hidden detail)

6 Calculate the total length of timber needed for these parts, ignoring waste.

- (4 × 450) + (2 × 300) + (2 × 250)
- = 1800 + 600 + 500 = 2900 mm (2.9 m)
