Answers and marking guidance

Award one mark per correct, developed point unless stated. Other valid answers should be credited.

2 Name a suitable hardwood.

- Beech
- Ash

3 Quick check

- a) Plywood
- b) Available in large, stable sheets
- c) Chipboard
- d) Beech

4 Key terms

- 1 – E
- 2 – B
- 3 – D
- 4 – A
- 5 – C
- 6 – F

5 Describe how you would identify plywood from its edge.

- You can see layers of veneer with the grain in alternate directions

6 Name a suitable board and give a reason for your choice.

- Plywood or hardboard
- Thin and stable so it won't warp; plywood is strong in all directions

7 Explain which wood is better for a hard-wearing table top.

- Oak
- Because it is harder/stronger, so it resists dents and scratches (compare with pine, don't just repeat the table)

No marks for: Repeating table values with no comparison
