2 Describe how to stop the cramp marking the wood.

- Place scrap blocks between the cramp jaws and the work

3 Quick check

- a) Measure both diagonals
- b) Mitre or band cramp
- c) To check the fit and squareness before gluing
- d) Use scrap blocks under the jaws

4 Key terms

- 1 – F
- 2 – C
- 3 – B
- 4 – D
- 5 – A
- 6 – E

5 Explain the purpose of dry cramping.

- Checks all joints fit and close up before glue is applied
- Lets the cramps be set to size and the frame checked for square, so problems can be fixed

6 Explain what is meant by ‘Stopping cramps denting the wood’.

- Scrap blocks between the jaws and the work

7 Explain what is meant by ‘Why wipe off excess glue’.

- Dried glue stops stain and varnish soaking in
