Answers and marking guidance

Award one mark per correct, developed point unless stated. Other valid answers should be credited.

2 Describe how manufacturing features ensure accurate and efficient assembly of a product such as a hairdryer.

- Location pins line the two halves up exactly
- Bosses take the screws and hold the halves together
- Ribs/webs hold internal parts (motor, circuit board) in position
- Asymmetric parts only fit one way
- Snap-fit clips remove the need for screws

No marks for: Naming the feature only

3 Quick check

- a) Add rigidity without thick walls and hold internal parts
- b) Accurate assembly
- c) To take a screw and strengthen the fixing point
- d) Flashing

4 Key terms

- 1 – C
- 2 – B
- 3 – A
- 4 – D

5 Describe the purpose of a boss and of a rib on the inside of the casing.

- Boss: takes a screw that holds the two halves together, and strengthens the fixing point
- Rib: adds strength and rigidity without making the walls thicker
- Rib: can locate and hold internal parts such as the circuit board

No marks for: "For strength" with no detail

6 Explain what is meant by ‘Split line’.

- Line where two halves of a mould meet.

7 Explain what is meant by ‘Shear marks’.

- Marks on edges cut by piercing or blanking.
