Answers and marking guidance

Award one mark per correct, developed point unless stated. Other valid answers should be credited.

2 Name the method of turning used for a bowl.

- Faceplate turning

3 Quick check

- a) Outside calipers
- b) Faceplate
- c) Rotate the work by hand to check it clears the tool rest
- d) So the drive centre grips and doesn't slip

4 Key terms

- 1 – B
- 2 – C
- 3 – A
- 4 – E
- 5 – D
- 6 – F

5 Describe two safety precautions when using the woodturning lathe.

- Wear goggles or a visor
- Tie back hair, no loose sleeves or jewellery
- Check the work is secure and rotate it by hand before switching on
- Set the tool rest close, and adjust it only with the lathe stopped
- Remove the chuck key / tommy bar

6 Describe how the diameter is checked during turning.

- Set outside calipers to 25 mm using a steel rule
- Stop the lathe and check the diameter with the calipers (or use a parting tool to cut to depth at intervals)
