Answers and marking guidance

Award one mark per correct, developed point unless stated. Other valid answers should be credited.

2 Explain two reasons a designer would use a 3D CAD model.

- Easy to change without starting again
- Can be viewed from any angle and rendered realistically for the client
- Can be tested or simulated before anything is made
- Can be sent straight to a 3D printer to make a prototype
- Can be shared electronically with the client or team

No marks for: "Quicker" with no explanation

3 Quick check

- a) They are quick and cheap to make and change
- b) Block model
- c) Scale model

4 Key terms

- 1 – B
- 2 – A
- 3 – C

5 Describe one benefit of a computer-generated model.

- Easy to change, realistic, can produce drawings and link to CAM/3D printing.
